**AUSTRALIAN PHOSPHATE RESOURCES**

**SCALE 1:10 000 000**

This map is based on information compiled from publicly available sources on phosphate deposits and phosphate resources, including world-class deposits. Compilation of data is ongoing.

Deposits size is the total tonnage of phosphate that is or was in a deposit as estimated by Geoscience Australia. It was derived by summing the tonnage of phosphate in deposits.

Regional resources are the aggregate of resources in deposits that is or was in a deposit as estimated by Geoscience Australia. It was derived by summing the aggregate of resources in deposits present in that deposit area.

Location information used in this map is derived from Geoscience Australia's Ozmin database for deposits.

It is recommended that this map be referred to as: Jaireth, S., Ozmin database for deposits
